

## Avatars on Voki.com

1. Create an account on <http://www.voki.com>
2. Once you are signed in select Create a New Voki
3. You can Customize your Character. Choose a new head, bling, and clothing.
4. You can also add a new Background.
5. When you have an avatar created you can reposition it in the window and tweak its shape and some of its color.
6. Next you Give it a Voice. You can record your message by phone, type in you message and choose a Voice and Accent/Language, record your voice with the USB microphone or computer microphone, or upload a audio file. If you are recording your voice go to System Pref to Sound to Input to make sure the internal microphone's volume is turned up.
7. After your avatar has a voice select Publish, name your character, it will then appear on your My Voki page.
8. You can email or embed your avatar into a web page.

### Embed into a Rapidweaver Website

1. Open your Rapidweaver website, add an HTML Code page.
2. On My Voki page select an avatar, then select Standard Web Page in the drop down menu next to **Embed in**, click on Get Code. A window will pop up with the code for your avatar.
3. Copy and paste this code into your HTML Code page. You can paste multiple codes onto this page.

### Embed into an iWeb Website

1. Open your iWeb website, add a blank page.
- 2 On My Voki page select an avatar, then select Standard Web Page in the drop down menu next to **Embed in**, click on Get Code. A window will pop up with the code for your avatar.
3. Return to iWeb, if Media is not shown, click on Show Media. Choose Widgets from the Media tabs. Drag the HTML Snippet onto your blank page. A box will pop up, paste the code into this box. You can drag multiple HTML Snippets onto this page.
